

Mikey's Burgers

Putting an END to all the incorrect information about our closing.

Long story short....when we were building the restaurant I was diagnosed with pneumonia. I continued to push forward to open Mikey's, the pneumonia turned into a lung infection that started to attack my organs. After losing half my lung and being in a coma for two weeks, I woke up with no body function whatsoever. After rehab and 98 days in the hospital, I came back to a restaurant that did not to feel like mine, others assisted in keeping progress moving.

Since that time, I have been working to get the product back to the Mikey's standard. As this process progressed there was a few employees that decided not to follow the processes and procedures that I was implementing in my business. The disrespect and resistance from a few employees was concerning at best.

This reached a high point when I had a argument in the parking lot with an employee about not following processes and procedures for the business. This then turned into this employee calling me every name in the book. At that point, I decided that my health was more important than this so I decided to shut the restaurant down and restructure our efforts.

Mikey's is the most gratifying thing I have ever accomplished. The 1% of customers that slander, outright lie and fabricate events is disgusting. The 99% of my customers that have told me not to quit and come back is the energy that will make us soar! To the 99% of our customers that love Mikey's - thank you for your loyalty...to the other 1% - end of story!

-Mike
