

Huron River Chain of Lakes Workshop

Understanding Lake Management & LakeScan™

Friday, October 27, 2017

7:00pm - 9:00pm

Hamburg Township Hall

10409 Merrill Rd., Whitmore Lake

Come hear from the expert about your Chain of Lakes!

Presenter: Dr. G. Douglas Pullman of Aquest Corporation

This workshop is designed to help residents understand the plant/weed system in the Chain of Lakes, as well as some of the emerging lake management challenges.

The Huron River Chain of Lakes is part of a select group of lakes where LakeScan™ monitoring and analysis have been applied. LakeScan™ is a state of the art lake monitoring method that can provide meaningful comparisons of lake-to-lake or year-to-year conditions. Using this method, truly informed decisions can be made about management strategies and direction.

Monitoring lake plant communities is new, informative, and fascinating!

Come spend your Friday evening with Dr. Pullman to learn what we all can do to make a better lake!

To be added to a listserv to receive notices of activities or information regarding the Huron River Chain of Lakes project, please email Jeff Krcmarik at: krcmarij@ewashtenaw.org
